

Out and about in the classes

...from the teachers, Term 3 2020

<p>Junior Hub</p> <p>Aimee, Christine and Diane</p>   	<p>The Junior hub have had a wonderful start to Term Three learning! We said farewell to Miss Cleveland as she prepared to welcome her gorgeous new arrival – baby Joshua! We are looking forward to meeting him once we are at level 1. Both Tarryn and her baby are doing well. We welcomed new students to Hihi and farewell friends to the Kiwi Hub. We are so lucky to have Mr Michael joining our team – helping out in so many ways. We also welcome Ms Watkin in Hihi who has been working alongside Mrs Loveridge. How lucky are we to have so many people working in our hub! During investigations we have been learning to make prints, construct masks, play in the home area, write cards, keep a shop/work with money, play table tennis, conduct experiments, ...the list goes on! We have also been learning to use Book Creator in digital technology and have created some lovely books to share with others. During our physical education sessions we have been learning gymnastics. We have learnt to balance, land and spring safely. We also trained very hard to compete at the Mosston School Cross Country – everyone should feel proud of the effort they put into running on the day. In writing we made some awesome “Grass Mates” who have since gone home to be looked after! In the next few weeks we are embarking on a “top secret” project! This was brought to us by ‘School Kit’ – we have been sworn to secrecy! Keep an eye on Seesaw to find out more!!</p>
<p>Kiwi Hub</p> <p>Brianna and Hayley</p> 	<p>This term has been another busy one. With the change in levels, it has meant we have made changes to some of the learning opportunities available to the children. However, all children have adjusted well. Room 3 have been working with Miss Cvitanovich on observational drawings, while Room 4 have been learning more about digital technologies with Mrs Carter and how to utilise these in the classroom. It has been exciting exploring science and looking into what scientists do, look like and how they think. We are heading towards becoming scientists ourselves in early Term 4. During PE, our tamariki have been gymnasts learning about rotating our bodies in different ways, balancing and using a motorbike landing. We also trained regularly for our Mosston School Cross Country. It was great to see all children taking part and running their hardest on the day! We have been lucky enough to explore music in our curriculum this term, using body percussion to learn about beat and rhythm. What a busy 6 weeks it has been!</p>
<p>Tui Hub</p> <p>Laura and Kate</p> 	<p>The Tui Hub hit the ground running this term and have managed to jam a lot in a short amount of time! We started the term with new learning maps and learnt a lot about the different skills we use in learning before setting goals for the next term. In our curriculum rotations, Room 5 have been learning how to create line and texture in observational drawing while Room 6 have been learning to use Imovie. We have also been lucky enough to have French with Miss Cole and have continued to develop our basketball skills in PE with Miss Addenbrooke. We trained regularly for Mosston School Cross Country and it was great to see everyone push themselves on the day. In inquiry, we are learning about how scientists work and exploring different areas of science. We look forward to doing our own investigating early next term. Room 6 has had some additional projects this term. They are taking part in the Wonder Project – learning about and building rockets, as well as Interschool Dancesport lessons and EPRO8! The Year 6’s have also started their transition journey to intermediate with some visits to learn about the different schools. Keep an eye on Seesaw for snapshots of our learning over the coming weeks!</p>
